

# ★ GPRS Modem/Gateway

*DS-GM01 is a smart GPRS modem used for RS232 or RS485 connected devices to transfer data to remote servers via GPRS connection.*

- *Flexible connection with industrial devices thanks to its internal microcontroller and RS232 / RS485 connection*
- *Easy to understand operation information with 3 LEDs*
- *Optional M-Bus / Modbus protocol support*

## Technical Features

- Rail mounted ABS enclosure
- Quad band GSM GPRS modem with embedded internet service protocols
- SMA antenna port for external antenna options
- SIM card connector
- 3 x LEDs for easy diagnostics
- 10-30V D.C. supply voltage
- RS232 / RS485 port for external device connections

## Optional Accessories

Product Code	Description
GM-ANT01	2 dBi panel mounted antenna
GM-ANT02	2 dBi wired (3m) magnetic antenna

## Order Code

**DSGM-XY**
