

*The DE30 7 zone independently according to the contact information from the 230V room thermostats and protects the heating line against waterless operation with the pressure switch.*

- It provides protection in case of jamming of the pump by its glass fuse.
- Supports 7 independent room thermostats connection.
- Thanks to the pressure switch connection, the pump works without water at low pressures protects against yeast.
- According to the run command from any of the 7 zones, the pump will provided the limit.
- According to the run command from any of the 7 zones, the pump will provides the limit.
- 4-wire, actuator connection with contact output.
- It provides waterproofing thanks to its IP65 box and gland connections.

## Technical Features

- 230 VAC Operating Voltage
- IP65 Gasketed Enclosure
- 3A Glass Fuse
- Dimensions: 146 x 222 x 54
